

Ans 2. Jupiter is the largest planet in our solar system.

Ans 1. The capital of France is Paris.

Ans 5(a). H_2O

Ans 5(b). $NaCl$

Ans 4. An object stays at rest or keeps moving in a straight line unless an external force acts on it.

Ans 6. The sun heats water in rivers and oceans, so it evaporates. The water vapour rises up and condenses to form clouds. When the clouds become heavy, water falls back as rain. This water collects again and the cycle repeats.

Ans 8. India got its independence in the year 1947.
